

## POLYMERIC COEXTRUDED MULTILAYER ARTICLES

### Abstract

5 Described is a polymeric coextruded multilayer web, the web comprising: at least  
two layers that are discontinuous in the cross-web direction, each layer comprising a  
plurality of distinct phases that are substantially continuous in the down-web direction;  
and at least one layer that is substantially continuous in both the cross-web and down-web  
directions; wherein said web has an x-axis that is in the cross-web direction of the web, a  
10 y-axis that is in the down-web direction of the web and a z-axis that is in the thickness  
direction of the web, and wherein the substantially continuous layer(s) lacks weld lines in  
the y-z plane of the web.
